Harvest is showing signs of significant progress. Yields are variable but probably better than we thought despite the significant dry weather. The feeder market has been very active and hopefully it will carry into 2021. As always, it's important to get your calf crop vaccinated. We always push the green tag program and most buyers are asking for a modified live vaccination program. Good luck with harvest and take it safe!

Fed Cattle/Weigh Cows Tuesday, Sept. 29th:

Lighter run of fed cattle during harvest on a market that was \$1 higher. Frontend Fed cows were \$1-2 higher with lean cows \$1-3 lower.

Well it finally happened....The Debate. I could have put two preschoolers in a
tree house and found out more of what they thought about the future of America
and the path we are heading for! When you say the word trillion, just think how
many seconds are in a trillion? Answer - 31,000 years. That's right 31,000 years
to get to one trillion seconds. Put that into one dollar bills and it will blow you
mind how many times you could put them end to end and reach the sun many
times. Does somebody in Washington really think they can tax us to reduce
this debt? Hell NO. The Roman Empire crumbled. Will our grandkids survive
the greed of the Washington D.C. fearless leaders and their stupidity? Hell NO!
